

RADIANT INNOVATECH

AML/KYC Transaction Monitoring Policy

Document ID: AML-POL-2026-03 | Effective Date: March 1, 2026 | Classification: Internal - Compliance

1. Purpose

This policy establishes Radiant Innovatech's requirements for anti-money laundering (AML) transaction monitoring and know-your-customer (KYC) screening, in line with FATF recommendations and applicable Basel Committee guidance on sound management of AML/CFT risks.

2. Screening Thresholds

Trigger	Threshold	Action
Single transaction	USD 10,000 or equivalent	Automatic flag for manual review
Aggregate daily transactions (same counterparty)	USD 25,000 or equivalent	Automatic flag for manual review
Cross-border wire to high-risk jurisdiction	Any amount	Mandatory enhanced due diligence (EDD)
Sanctions list match (OFAC/UN/EU)	Confidence score above 85%	Immediate hold; compliance officer notified within 1 hour

3. Suspicious Activity Reporting (SAR)

Once a transaction is confirmed suspicious by the AML review team, a Suspicious Activity Report **must be filed with the relevant Financial Intelligence Unit within 30 calendar days** of the initial detection date. Preliminary findings must be escalated to the Chief Compliance Officer within 48 hours of detection, regardless of the filing deadline.

4. Sanctions List Screening

All new customer onboarding and all outbound wire transfers are screened in real time against the OFAC Specially Designated Nationals (SDN) list, the UN Consolidated Sanctions List, and the EU Consolidated List. Screening lists are refreshed **every 24 hours**. A confirmed sanctions match results in immediate account freeze pending compliance review.

5. Escalation Procedure

Tier 1 (frontline) flags → AML Analyst review within 4 business hours → Tier 2 escalation to Senior AML Investigator for confirmed matches or ambiguous cases → Tier 3 escalation to the Chief Compliance Officer for any case requiring a SAR filing or account termination.

6. Review Cadence

This policy and its screening thresholds are reviewed **quarterly** by the AML Steering Committee, and immediately upon any material regulatory change. Last review: February 14, 2026. Next scheduled review: May 14, 2026.
