

RADIANT INNOVATECH

Business Continuity & Disaster Recovery Plan

Document ID: BCP-DR-2026-02 | Effective Date: February 10, 2026 | Classification: Internal - Compliance

1. Purpose & Scope

This plan defines Radiant Innovatech's recovery objectives and procedures for restoring core banking operations following a disruptive event, satisfying Basel III operational resilience expectations and internal audit control IR-PLAN-01.

2. Recovery Objectives

System	RTO (Recovery Time Objective)	RPO (Recovery Point Objective)
Core banking ledger (Fineract)	4 hours	15 minutes
Payment/SWIFT gateway	2 hours	5 minutes
Compliance & audit logging systems	8 hours	1 hour
Internal collaboration tools	24 hours	24 hours

3. Backup Site & Infrastructure

Primary data center: us-central1 (Iowa). Warm standby failover site: us-east1 (South Carolina), maintained at 100% capacity parity with production. Cross-region database replication runs continuously with a measured replication lag under 90 seconds.

4. Failover Procedure (Summary)

(1) Incident Commander declares a DR event and notifies the crisis line. (2) Database replicas in the standby region are promoted to primary. (3) DNS/load-balancer traffic is cut over to the standby region. (4) Core banking and payment gateway health checks must pass before customer traffic resumes. (5) Post-incident review is completed within 5 business days of service restoration.

5. DR Testing

Full failover tests are conducted **semi-annually**. The most recent test was executed on **January 18, 2026**: core banking failover completed in 3 hours 42 minutes (within the 4-hour RTO), with zero data loss recorded against the 15-minute RPO target. Result: **PASSED**. The next scheduled test is July 18, 2026.
